"Tyler Pipe & Coupling strongly recommends that its hubless cast iron pipe and fittings be joined with shielded couplings manufactured in accordance with CISPI 310. The use of unshielded couplings or any coupling not meeting the above specification will void the product warranty."

WARNING! Testing with compressed air or gas in Cast Iron pipe and fittings may result in explosive failure and could cause severe injury or death. Tyler Pipe recommends hydrostatic testing as described in the CISPI Handbook. *Never test Cast Iron pipe or fittings with compressed air or gas!*
